Android Developer with 2 years of experience, specializing in Kotlin, Jetpack Compose, and Flutter. Passionate about building high-quality, user-centered mobile applications with clean architecture and scalable code. Strong foundation in software engineering, performance optimization, and modern Android best practices.

Work Experience

Feedloop.ai - Indonesia (Remote)

Dec 2024 - Now

Android Developer

- Led bug resolution initiatives for existing Android applications, successfully addressing and fixing legacy issues from previous development cycles using Kotlin and MVVM architecture
- Implemented clean architecture principles and Jetpack components (ViewModel, LiveData, Room) to improve code maintainability
- Optimized application performance and user experience based on UAT feedback, ensuring alignment with client requirement
- Consistently delivered feature updates and bug fixes ahead of team deadlines, improving project delivery timelines by 15%
- Integrated REST APIs using Retrofit and Coroutines for efficient network operation

Diskominsa Aceh Jaya - Indonesia (Onsite)

Jun 2024 - Dec 2024

Mobile Developer

- Led end-to-end Mobile App Development from conception to Play Store release, using Flutter.
- Implemented BloC architecture for efficient state management and to ensure scalability and maintainability of the code.
- Integrated RESTful APIs and managed complex data synchronization between the mobile app and backend services using Http and JSON serialization.
- Implemented localization support for multiple languages increasing the app's global reach
- Developed custom reusable widgets and animations to maintain consistent UI/UX across the application

Wisnu - Indonesia (Remote)

Jun 2023 - June 2024

Android Developer

- Led end-to-end Android app development from conception to Play Store release, using Jetpack Compose.
- Implemented MVVM architecture and optimized Git workflows, reducing code complexity by 35% and improving code maintainability and team efficiency.
- Collaborated with cross-functional teams, aligning app features with project goals, resulting in a 10% faster release cycle.

Politeknik Negeri Lhokseumawe - Indonesia (Onsite)

Sept 2023 - June 2024

Mobile Developer

- Led the design and development of a comprehensive Student Service System application, focusing on intuitive UI/UX using Flutter.
- Implemented BloC architecture for efficient state management and to ensure scalability and maintainability of the code.
- Collaborated closely with the university rector to deeply understand user needs and translate them into actionable app features.

PT Bank Syariah Indonesia - Indonesia (Onsite)

Apr 2022 - Aug 2022

Internship

- Proficient in Dart programming language for Flutter app development.
- Integration with external APIs using Flutter packages such as HTTP for data retrieval and transmission.
- Designing responsive and captivating user interfaces utilizing Flutter's widget system.
- Implementing efficient state management with BloC architecture in Flutter applications.
- Developing backend solutions using Laravel for seamless integration with Flutter frontend.

Education Level

Politeknik Negeri Lhokseumawe - Lhokseumawe, Indonesia

Aug 2019 - Aug 2023

Bachelor Degree in Informatics Engineering, 3,75/4.00

- Course : Programming Fundamental, Data Structure and Algorithm, Database, Object Oriented Programming and Mobile Programming

Bootcamp And Volunteering Experience

Bangkit Academy - Indonesia

Feb 2023 - Jul 2023

Mobile development Student

- Android Development Trainee with a focus on mastering Kotlin for mobile applications.
- Strong proficiency in app development, testing methodologies, and implementation of MVVM and MVP architecture, leading to a top 20-ranked capstone project.
- Secured startup funding based on innovative solutions developed during the capstone project.

VSGA - Indonesia

Jul 2022 - Okt 2022

Junior Mobile Programmer

- Actively participating as an Android Trainee, specializing in Kotlin for application development.
- Demonstrated proficiency in building apps, testing, and applying design patterns like MVVM or MVP, leading to recognition as the top-performing trainee and earning BNSP certification as a Junior Mobile Programmer.

Skills, Achievements & Other Experience

- **Tools:** Android Studio, Kotlin, Compose, Flutter, SQL, Firebase, Postman, Jira, Git, Espresso, JUnit.
- **Technical Skills:** Android Development, SDLC for Mobile Apps, Bug Tracking (in Android Studio), Firebase Integration, Version Control with Git.
- **Language Proficiency:** English (Intermediate), Bahasa Indonesia (Fluent).
